BANNER VIRALIZER – Get Your Banners Shown On 1000's Of Sites!
Written by [Dorin](#) & [Cool offer](#)

Firstly I would like to thank you for downloading and reading this short report.

Banner advertising is one of the most targeted traffic sources, as people only click on a banner if they are interested in it. The problem with traditional banner advertising is that you have to join many sites, and add your banners to those sites to get your ads shown. Also if you want to change your banners or remove a banner, you have to login to each site and update your banner campaigns.

But now with a viral banner co-op, you can get your banners shown on 1000's of different advertising sources, without even being a member of them! Also you can now simply login to one site and add or change your banners, which will then be updated at all the sites.

Another advantage of using banner advertising is that at many sites such as Traffic Exchanges and Viral Mailers, you get many more banner impressions per credit. This means you can get loads more exposure and branding power for the same amount of credits.

Also at many sites your banners are shown in the members area and not only in the surf area, which means your ads are getting seen when people are not so distracted like when surfing.

Simply follow the steps outlined in this report and start getting **MASSIVE exposure** for your banners. To get even more exposure for your banners, make sure to visit the last page and rebrand this report. As the more people you get to join under you in the viral banner coop, the more banner impressions you will earn from your downline.

This means the less banner impressions you will need to earn by yourself!

STEP 1

Join [BucketsOfBanners](#) (aka BoB) [HERE](#).

This is a free Viral Banner Co-Op, that allows you to promote the Banner Co-Op links in your Traffic Exchanges and Viral Mailers, which earns you impressions to promote up to 5 (more if upgraded) of your own banners in the Co-Op rotator. Free members earn 0.5 impressions per Co-Op URL shown, upgraded members earn 1 impression.

From the left menu select "**Get Impressions**" and then select "**Banner Exchange Code**".

Now simply click the "On Other Sites" tab and you can copy the Banner Image and Target URL to use in the Traffic Exchanges and Viral Mailer sites.

The screenshot shows a web interface with a left-hand navigation menu and a main content area. The menu items are: Manage Ads, Purchase Ads, Get Impressions (highlighted in yellow), Surf For Impressions (highlighted in green), Commissions, Promo Tools, View Downline, and Downline Builder. The main content area has three tabs: "On Your Sites (468 x 60)", "On Your Sites (125 x 125)", and "On Other Sites (468 x 60)". A red arrow points to the "On Other Sites" tab. Below the tabs, there is a text box with the instruction: "Use these links on other sites where you would like BoB banners to be displayed. (These links are for use at other sites where they can be entered. The images displayed are 468 x 60 pixels.)". Below this, there are two input fields: "Banner Image:" containing the URL "http://bucketsofbanners.com/banimg.php?rid=25077" and "Target URL:" containing the URL "http://bucketsofbanners.com/banlink.php?rid=25077". Red arrows point to both of these input fields.

STEP 2

Now simply visit all the Traffic Exchanges and Viral Mailers that you are a member of.

In the banner advertising section at each Traffic Exchange or Viral Mailer site add the Bucket Of Banners co-op links into the relevant input fields.

Now simply assign credits to your Buckets Of Banners Co-Op Banner and you will start to earn impressions.

STEP 3

Go back to your Buckets of Banners account and from the main menu select "Manage Ads" and then select "Create New Ad".

Add your banner there. As a free member you can add up to 5 banners, consider upgrading for more benefits - up to 30 banners (both 125x125 and 468x60 banners).

STEP 4

Now to assign credits to your banners select "Manage Ads", then select "Assign Credits". Now simply enter the amount of credits to assign to each banner, the maximum you can assign is shown in brackets. Then simply press "Assign" and your banner will start to be shown across the network of sites.

You can also Bulk assign credits to all your banners by selecting "Bulk Assign" on the top menu. This assigns credits evenly to all your banners at one time.

Enjoy!
